

Our Expertise:

Loc Performance is ready to partner and build solutions. When faced with a challenge, the Loc team focuses on the objective, and then uses its in-house tools and expertise to swiftly deliver a robust solution. Loc Performance offers fully-integrated expertise at every stage, from product development, manufacturing, supply chain management, service support and more.

Loc began serving the defense industry in 1985 and quickly became the preferred supplier for tracked vehicle suspension systems. In 1990, Loc became the first small business awarded a multi-year, multi-million dollar contract for M-1 Abrams Final Drives.

Loc is a full-service provider of driveline, suspension, track systems, rubber products, armor products and fabricated structures for vehicle platforms. Loc sells direct to the Government, its major prime contractors, as well as prominent vehicle manufacturers in agriculture, construction, mining, locomotive, mass transportation, and oil & gas industries.

*“To serve as the
defense and heavy
industry market leader
for track systems,
fabricated structures,
power transfer and
suspension systems
supplying the U.S. and
allies worldwide.”*

Product Development

- Loc is a leader in design and engineering. With over 40 years of industry experience, Loc has adopted numerous design, prototyping and production procedures proprietary to our company. While our team is a confident partner in build-to-print projects, our engineering team collaborates with customers in the development of new designs, and to innovate existing designs for manufacturing.
- In-house design and engineering capabilities allow Loc to take on difficult tasks while maintaining the level of quality, delivery and compliance expected of an industry leader.
- Loc's skilled engineering team utilizes the proprietary Loc Product Development Process (LPDP) to plan, execute, and manage all product design programs. LPDP is a gateway-based process that offers our customers complete transparency throughout the design and development life cycle. This process contains milestone reviews, technical deliverables, risk management, and requires peer reviews to assure the highest quality for all technical deliverables

Loc Performance Products

Trackman

We don't just make rubber track. We make the world's best rubber track, for more than 20 years.

Military Track Systems

The industry leader of Military Track Systems and road wheels since 1940, Loc is the only qualified supplier for every major Ground Combat Vehicle platform in the U.S. Army fleet.

Fabricated Structures

A leading provider of large structures and complex integrated platforms, Loc manufactures any hull in the combat vehicle fleet, from raw plate to finishing.

Mechanical Systems

Best-value, full service, provider of driveline and suspension systems. Loc Performance focuses on highly complex, precision assemblies up to 1,200 lbs.

Armor Products

Full-service provider of critical armored components. In-house ballistics lab used to design, develop and integrate armored solutions.

Rubber Products

From hay conditioner mower rolls to bladder bags, wheels and mounts, Loc is a leader in rubber products.
